Chief McKinstry,  
Lady Lake Chief of Police

The **Active Shooter Training Lunch & Learn** was hosted by the Lady Lake Library and presented by the Lady Lake Police Department. It was held at the Lady Lake Library September 27. The goal was to learn to recognize potential workplace violence indicators and know what to do and how to handle yourself before you're in an active shooter situation. It was very informative. Thank you Lady Lake Chamber and Lady Lake Police Department.

## Print Newspapers

### PRINT NEWSPAPERS AND THEIR DECLINE

In the US one of the largest print publications, with 13.2 million circulation, has been able to move only 750,000 to using digital format. Actually the same is true in the top three. AARP is the largest and Costco Connection is one of the top three.

A print newspaper is tangible, people can sit at the breakfast table with a cup of coffee and read the paper and any national poll will tell you that. Most full size tabloid newspapers are at least six times bigger than a smart phone and easier to manipulate. On a full size screen it is something else. I read our papers before we release it and it is easy to read on a full size computer screen and easy to go to the next page or back up.

## Made in the USA

By TomL

Where was the American Flag made that you are pledging allegiance too? Millions of American Flags that we pledge to are made in China. To date we don't have tariffs on them. "I say we should not let anyone import them here!" I was talking to a local business that sells made in the USA flags. He says people are selling these flags online and it does not seem to matter where it's made! My flags were made by the American worker, transported to stores all over the USA by trucking companies and sold in the stores here in the USA. They cost a little more, but they should be worth it to the people pledging to flag. Some of the people making the flag

could be vets or family members of those that gave the ultimate sacrifice. So please take the time to look at the flag you are buying and look at the flag you are pledging to and make sure it is made in the USA, the greatest country on earth! Look at all of the products you buy, I mean everything including groceries, especially meats & produce. Steaks grown in the USA and processed in the USA will cost more, but you know what is in the meat. A cattle rancher in another country could spray a field with pesticides while the beef steers are grazing there. The pesticide is then in the steers' stomachs. Do you see what I mean? Buy USA!

TomL said that!

## Arrest in Summerfield Murder Investigation

### ARREST MADE IN SUMMERFIELD MURDER INVESTIGATION

MARION COUNTY, Florida (September 26, 2018) - Marion County Sheriff's Office (MCSO) Major Crimes detectives have arrested 36-year old Jake Napier (DOB: 06/28/1982) for the murder of Walter Russell Elliott which occurred in July of 2018. During their investigation, MCSO Major Crimes detectives discovered surveillance video that depicted Napier shooting and killing the victim.

On July 28, 2018, at approximately 1:00 p.m., MCSO deputies were called to 5495

Southeast 145 Street in reference to a man being shot and set on fire. Deputies responded and found victim Elliott deceased in a workshop located under a pole barn on the property. MCSO Major Crimes detectives responded and began their investigation. It was later determined that Elliott's cause of death was a gunshot wound to the head and that his body was set on fire after his death. During their investigation, detectives discovered surveillance cameras in the workshop which captured the murder on camera. The footage showed the victim

■ A.J. "Tony" Powell

## AS I SEE IT

by A.J.(Tony) Powell

Who said "Restricting immigration is offensive, and contrary to American values"? Most media outlets label anyone who disagrees with them a 'xenophobic'.

So, just because I disagree with you, I have a 'phobia'?

Fact is that the law says "An alien is inadmissible if they are "likely to become a public charge".

Doesn't that mean that it's 'legal' to stop the current invasion of the United States? Of course the argument is not new. It was way back in 1790 that James Madison said something like, "Legal immigration is intended to 'increase the population', but only if they add to the strength and wealth of America". He said, "America should welcome the immigrant who can assimilate, but exclude the immigrant who doesn't 'fit in'".

The (Legal) population of the United States of America includes just about every color and culture found anywhere in the world. So any 'legal' immigrant can 'fit in' if they have the determination to become acceptably 'Americanized'.

First President, George Washington said that "Immigrants should be absorbed into American life so that "by an inter-mixture with our people they get assimilated to our customs and, laws".

Alexander Hamilton said, "Permitting an uncontrolled invasion of unknown and even hostile immigrants will, in time, create 'great public danger' putting the interests of their 'home country' ahead of America. And he

warned against "Admitting foreigners indiscriminately to the rights of citizenship the moment they put foot in our country".

Not much has changed in the hundreds of years since. Trump and his supporters say "America First". But I say, "AMERICANS FIRST". There is a difference! By law, immigrants don't have a constitutional right or civil right to demand entry to the United States. And, how does it help ordinary working Americans, to bring in hundreds of thousands of uneducated, foreigners who don't even speak English and who can't pay their own way?

Even today, about half of immigrant-headed households use welfare &/or other benefits paid for by working Americans, including food assistance and housing vouchers. As I see it, importing cheap labor, means hiring fewer Americans. Even at the higher pay scale, educated, qualified Americans are fired, as a result of the flood of recent the so-called H-1B visas which permits big companies to replace their current American tech workforce with cheaper immigrants. It's regularly reported that the 90% of wealth in America is owned by a small group of the 'Big City Elite'.

Uncontrolled immigration, steals from American workers, taking their jobs and cutting their pay. 'Illegals' pay less taxes and get more benefits than American workers. Some estimates claim that those 'illegals' cost up to \$50 billion – all paid for by working Americans.

Fable tells of "Robin Hood". But, our modern world is controlled by "Robbing

Hoods" who rob the (working) poor to help the rich. The Golden Rule used to say, "Do unto other as you would have them do unto you". But now we have "The guy with the gold rules!"

'til next time...

## False Information about FAIRtax

Florida governor candidate Adam Putnam has endorsed false information about the FAIRtax bill HR 25 as co-sponsored by Ron DeSantis. FAIRtax is not in addition to the federal income tax. The FAIRtax is REPLACEMENT tax for the present income/payroll tax system. Representative DeSantis understands the evils of the present federal income/payroll tax system.

Florida has no state income tax. Unlike other states which have both state income taxes and state sales taxes, the state of Florida receives its revenue from a state sales tax. This appeals to many who are moving to Florida to escape their states' income taxes and , more importantly, to

# Tribute To American Soldiers

(NAPSI)—More than 30 million Americans have served in the United States Army. If you or someone you care about is among them, you can now order a personalized, commemorative brick that will be permanently placed along the pathway to the future National Museum of the United States Army.

## Making a Museum

The National Army Museum is rapidly taking shape at Fort Belvoir, Virginia, just south of Washington, D.C. This national landmark will be the first museum to tell the

entire history of the nation's oldest and largest military service. The massive 185,000-square-foot building will display a collection of Army artifacts, historic documents, and Soldier artwork. The vast majority of these priceless selections have never been seen by the public.

"For those who served, the Museum will provide a place of reflection," said retired Army Chief of Staff, General Gordon R. Sullivan, chairman of the Army Historical Foundation. "For the rest of America, it will be an educational institution that conveys American history through the eyes and stories of Soldiers, teaching our nation how the U.S. Army has shaped nearly every major event in our country's history."

In the two years since groundbreaking, the building's frame has been completed, and crews have installed the stainless-steel panels that make up its exterior. Inside, the circular walls of the 300-degree Army Theater are set, and four of the Museum's largest artifacts are in place.

## How You Can Be a Part of It

The U.S. Army designated the nonprofit Army Historical Foundation to lead the campaign to build the Museum. The Foundation developed the Commemorative Brick Program to raise funds for construction and offer serving Soldiers and Army veterans and their families a way to forever be part of the historic national landmark.

The personalized bricks are currently being installed along the pathway leading to the Museum's main entrance. Made of Mesabi Black granite, the impressive tributes will set the stage for the Museum experience.

Individuals and organizations can still order bricks at

[www.armyhistory.org/bricks](http://www.armyhistory.org/bricks).

# FAIRtax

*continued from page 2*

have financial liberty. Residents choose when they pay state sales taxes by their spending habits. All the while all people who make purchases in the state contribute to the state coffers. What is working best for Florida is also best for the country by having FAIRtax, the national sales tax, provide the same amount of federal revenue and apply fairly to all citizens.

Today seniors are not tax free as they, like all consumers, are still paying over \$0.23 per dollar in hidden/embedded business taxes that are collected through higher prices. The FAIRtax eliminates this deceitful tax practice. The bill replaces the current standard deduction in the income tax form with a monthly tax refund called the Prebate. That amounts to \$233 per adult and \$83 per dependent to untax all legal residents up to subsistence level spending. Thus you control how much tax you pay. You are in charge of your effective tax rate by your spending habits.

The FAIRtax eliminates the federal income tax, payroll tax, withholding tax and the required minimum IRA distribution starting at age 70 1/2. I urge candidate Putnam and all voters to learn more about the FAIRtax at <http://bigsolution.org/>

Nick and Barb Rudelic

# Murder

*Continued from page 1*

sitting in a chair at the workshop with Napier and several other witnesses in the room. Napier suddenly shoots the victim in the head and the witnesses scattered. Napier is then seen pouring accelerant on the victim and the surrounding area, and setting the victim on fire.

After the murder, Napier fled to Texas, where he was later captured and arrested for a Marion County warrant for Arson and Tampering with Evidence. He was transported from Texas to the Marion County Jail and given no bond. Detectives charged Napier with Second Degree Murder on Tuesday afternoon.

## PUBLISHER'S NOTES

By TomL

I guess the question today is Resist or Results? The American people are smarter than some would like us to think. The working people shopping a Walmart or spending money are what make our economy work. More and more of them are getting the idea that they need to vote. The working person was suppressed for eight years and now they are beginning to understand.

In the past, minorities have been promised a better way of life without contributing anything. That does not work. Look at all the people trying to flee other countries that have Socialism. Again it will only work for a little while. The rich move their money to another country where they don't have to support people who don't want to work.

\*\*\*\*

All can I say is, to the working man and woman, please pay your taxes - 12 million

undocumented residents are depending on you!

\*\*\*\*

There are some interesting photos floating around the internet. The Senate nominating committee proceedings were disrupted by a number of paid disruptors. Witnesses reported that one of the women started shouting "stop Kavanaugh". She was removed and she went straight to the person that was known as the Paymaster and pictures showed her receiving what looked like a pretty hefty amount of cash. My first question is... Is that legal? Can the paymaster be jailed or at least expose whoever is paying them to disrupt meetings. Who is paying for this problem? The list is long.

\*\*\*\*

I don't like some of the things the President has done and or said but it is going to take someone like him to clean up Washington - someone who can get down & dirty! The same for the world trade. America

needs to hold its head up. Have you ever heard "be careful not to wake the sleeping giant?" I always thought it was China but now I think it's us. America is the sleeping giant. Many legal residents of this country (TAX PAYERS) would like to know why we pay countries who hate us in the first place. Do we think we can change their minds by giving them money? Well it has not worked. Meanwhile there are people in these same countries being starved, tortured and killed, some in the most inhumane ways to die by debilitating gas, some die slowly.

\*\*\*\*

I had a guy send me a message about throwing papers to his yard, he said "why don't you concentrate on just going online only instead of throwing this rag in my yard?" On the other hand I had a husband and wife send me a message that they love to sit at the breakfast table and read the paper

over a cup of coffee. I would love to cut the expense of printing the papers. Let's see... I would no longer have to pick them up in the dark, pay people to bag them, loading them into a van and taking them to the carriers. All this I pay for because print newspapers will always be a way of life. It is a tangible item. When you run an ad in a paper and a reader is reading the newspaper, the lights flicker and then computer screen goes black, the newspaper is still there to read. You can even use it after reading to wrap your fish in it or line your bird cage; I even heard some say they clean their windows, etc.

\*\*\*\*

A writer who has written twenty two books called me from Jacksonville. He saw the paper and wanted to talk and maybe meet next time he comes to the area. He likes the Villages and might want to move here. I mentioned it to Karin Nicely who said the same writer had contacted her. The paper does get around. I get calls from Orlando, Tampa, Jacksonville, Atlanta even Dania Beach Florida where I spent my early years.

Great short story, last month I told a story about my first newspaper job at age nine selling papers at a draw bridge in south Florida. It seems there was someone doing the same thing, in the very similar way just a few miles from where I was selling papers.

## Publisher's Notes

*Continued from page 4*

He saw the story I wrote and called. He said he just wanted to talk to someone who led a similar life the same area. When comparing our ages, I was the senior by ten years. But it was fun talking about the good old days when a kid could work outside the home and be safe. Both things have changed. That's why I live in the woods.

\*\*\*\*

Fox News: I like fox news because they are not trying herd their watchers around like sheep to their way of thinking. I think they are fair but biased. How could you not be biased with all that is going on in the Federal Government? The worst in my opinion is Kerry going to Iran and having secret meeting telling their leaders to wait out the president and he would put their deal back together. Meanwhile Obama is doing what no other past president has done and that is interfere with the current president. Anyway back to Fox News. You can only tell the story so many times until it just becomes old news. Maybe in about two hours in today's light speed world. They need to diversify. When I get tired of the regular Fox News I go to the Financial Fox program. Recently the storm hype was ridiculous. Hurricanes are tragic enough but Rush Limba called it. Now remember this Hurricane hype has gone on 4 to 5 days. Rush said "news media people will go out in the storm in rain coats, let the wind blow them around and tell people don't go out it's dangerous."

I really think the national weather people could predict that the hurricane was going to do what it did. A lot of federal money exchanging hands. A number of states ask for federal money days before it hit. I hate that we lost lives but something just make me feel uncomfortable about the whole money thing.

I was through five major hurricanes in south Florida as a kid and no one gave us money to rebuild. The town council met, figured out how to come up with the money to fixed the schools and neighbors helped each other. Yes there was loss of life and it hurt just as bad back then as it does now. There was no federal money, no bailouts!

\*\*\*\*

I was sent an interesting message...I returned my Nikes because they hurt my feet while standing for the National Anthem! Another person said I can't afford to throw away or burn my Nikes, so I took a magic marker and blackout the logo!

What say you? [tloury@att.net](mailto:tloury@att.net)

is a great opportunity to make new connection at the Waterfront Inn. A great time was had by all.

## Recovering From Stroke

(NAPSI)—Stroke is a leading cause of long-term disability—in fact, it's even more disabling than it is fatal. The period following a stroke can be difficult for patients and their loved ones, as they grapple with the uncertainties of recovery.

For example, Sabrina Warren-White was a busy professional when a stroke in left her unable to speak or use her right side. She quickly began a rigorous rehabilitation program and can now speak, walk and use her right arm.

### Doctor's Advice

Once acute medical issues are resolved, focusing on rehabilitation is paramount to helping people build their strength, capabilities and confidence, said Dr. Larry B. Goldstein, the Ruth L. Works Professor and Chairman for the Department of

Neurology and Co-director for the Kentucky Neuroscience Institute and KY Clinic at the University of Kentucky.

"Most patients will recover to some degree, but a coordinated, multidisciplinary approach to rehabilitation is crucial because it has been shown to result in better outcomes for patients," Dr. Goldstein added.

Access to coordinated and intense therapies after a stroke is important because the greatest amount of recovery tends to occur in the first 30 days, Dr. Goldstein said.

"Intensity of rehabilitation therapy matters," he pointed out. "Patients need access to good rehabilitation services and should continue to work at it, even after that initial recovery period."

### Where To Turn

To help, the American Stroke Association's Together to End Stroke

initiative, nationally sponsored by Kindred Rehabilitation Services, raises awareness that stroke is largely beatable through high-quality rehabilitation, patient support, and implementation of Stroke Rehabilitation and Recovery Guidelines.

Patients and caregivers can access more information about recovery and how to make informed decisions at

[www.StrokeAssociation.org/recovery](http://www.StrokeAssociation.org/recovery).

## LIFE AFTER STROKE.

Florida State Senate

## DENNIS K. BAXLEY

### Serious Business

Friends, some very serious questions will be answered by you this November and never have the prospects for Florida's future been in more stark contrast as we are looking at two very

different visions in the Governor's race. Ron DeSantis (R) represents a solid free enterprise, strong Florida and strong America plan, based on close alignment with our President's worldview. It is a path of protecting core American values of faith, family, freedom and opportunity. This path has led to unprecedented economic stability, job growth, low unemployment, government financial stability (Florida is currently #1), lowest violent crime rate in 47 years, and significant investments in making capital welcome. In polarizing contrast, the Tallahassee Mayor Gillum is a far left socialist democrat who is openly proposing higher taxes, more central control of government, and is closely aligned with George Soros and his post-America globalist worldview. Meanwhile, no one is seriously addressing the Mayor's corruption concerns, mismanaged storm recovery, and high crime rate (highest in the State of Florida) that is plaguing the City of Tallahassee under Gillum's regime.

On November 6, you will answer these three questions. First, who do we want to lead our State as Governor, Attorney

General, Commissioner of Agriculture, and Chief Financial Officer? Second, will we maintain conservative majority leadership of the Florida Senate, Florida House of Representatives and the U.S. Congress? Finally, what will Florida's Constitution look like after you weigh all the proposed amendments? (when in doubt, vote NO!)

Our State and our Country are counting on you! Your vote has never mattered more. Senator Dennis Baxley

## Managing Heart Failure

### Managing Heart Failure Is Worth The Effort

*A study by the American Heart Association shows people with HF report spending more time on managing their condition; free app aims to make it easier(NAPSI)—The American Heart Association, the world's leading voluntary health organization dedicated to building healthier lives, free of cardiovascular diseases and stroke, shared this month that more heart failure patients and their caregivers report they are putting more effort into managing this complex condition. In 2015, just 55 percent of survey respondents said they were working harder*

to manage HF. The latest study shows a 14-point increase, with 69 percent now putting effort toward the important daily task of managing heart failure.

The AHA conducted its annual survey as part of the Rise Above Heart Failure initiative, nationally supported by Novartis Pharmaceuticals Corporation, and found that while those diagnosed with heart failure and their caregivers are spending more time and energy managing the disease, they are benefiting. These two groups showed an increased understanding of heart failure since the survey was last conducted.

"It's important to understand heart failure or any condition you have been diagnosed with," says John Osborne, M.D., cardiologist and American Heart Association volunteer. "It allows you to ask better questions of your healthcare providers and take an active role in your health."

Through Rise Above Heart Failure, people living with heart failure can access free tools to help make the daily task of managing medications, symptoms and doctor's visits simpler. This includes an app called HF Path, designed to keep all aspects of heart failure management at a patient's—or caregiver's—fingertips.

Heart failure, which occurs when the heart is not able to efficiently pump blood around the body, can cause symptoms like breathlessness, persistent coughing, swelling and fatigue. "It's important for heart failure patients to track their symptoms day to day so they can alert their healthcare provider to any warning signs of worsening HF and get prompt treatment," said Osborne. "World Heart Day serves as a great reminder to us all to make a promise to better

understand and advocate for our own health."

Download the app at [heart.org/HFPath](http://heart.org/HFPath).

# Johnny Mello Show & Dance Tree Trimming and Debris

Tickets to The fall Johnny Mello Show & Dance are now on sale. If you like Doo Wop, Country & Rock N Roll, you'll love this show. You'll enjoy seven different singers live on stage, a special 10-gift basket raffle, a 50/50 cash drawing, line and regular dancing, lots of door prizes and much more.

It's a fundraiser with net proceeds benefiting Have A Heart For Companion Animals, Inc., as they continue their animal welfare education efforts. They are a 501 c-3 not for profit organization.

The show is being staged at the Lady Lake American Legion Hall in Lady Lake (466 & Rolling Acres Road). (Door open at 5:30 p.m. on Friday 10/26/2018.) Showtime: 6-9.

Tickets are \$15 per person and if you buy 6 or more, you can have a table reserved just for your group. Tickets are available at Whole Earth Pet Supply, in The Villages or on-line at [www.thejohnnymelloshow.com](http://www.thejohnnymelloshow.com).

You can bring your own snacks but beverages must be purchased at the show. This show is open to the public.

For further information, Question and Directions Please Call 352-687-1776

**Tree Trimming and Debris Removal Information for City Residents**

**OCALA, Fla.** (Sept. 13, 2018) – The City of Ocala Public Works Department, Sanitation Division would like to provide the following tips to City residents to keep them safe and informed when selecting a company to perform tree work on their property this fall.

“The threat of severe weather events, declining tree health or residents' desire to have trees removed on their property creates a heightened awareness of trees and their threat to homes and businesses,” said Dwayne Drake, Sanitation Division Head, City of Ocala. “It is important for residents to know what their tree trimming and debris removal options are and what they should expect from a tree service company.”

- All contractors, or those doing the work, are responsible for hauling off all tree debris immediately upon completion of the job.
- Residents will be responsible for any debris not hauled off, not the City of Ocala.
- Residents should not pay in full until all

work is completed and the debris is removed.

- Residents should obtain contact information from the contractor, or those doing the work.
- Contractor information should be visible on their vehicles.
- Residents are strongly encouraged to use contractors who are licensed and insured.
- Tree debris should not be placed in front of vacant lots.
- If tree work is done specifically by the homeowner and is placed out for collection, any pile over 4' x 5' x 6' is considered a chargeable load. Residents will receive a notice from the City for the cost to remove and would have seven days to remove it or they will have to pay the City for removal. Debris must be no more than four feet in length and placed next to the road at the location where the work is completed.

For more information, please contact the City of Ocala Public Works Department, Sanitation Division at 352-351-6697.

older vehicles are more likely to delay routine maintenance.

**Expert Advice**

“There is an old adage that if you take care of your car, your car will take care of you,” said Rich White, executive director of the nonprofit Car Care Council. “Making time to perform routine auto care not only ensures a safer, more dependable vehicle, but car owners can preserve the trade-in value and save money by addressing small issues before they become more complicated, expensive repairs.”

**What You Should Do**

The most common maintenance procedures to keep a car operating safely and reliably while maintaining its long-term value involve checking the oil, filters and fluids, the belts and hoses, brakes, tires and air-conditioning. An annual tune-up and wheel alignment are also good ideas.

**Where To Get Help**

To make it easier for car owners to remember to include auto care in their busy schedules, the Car Care Council offers a free custom service schedule and e-mail reminder service. This simple-to-use online resource can be personalized to help make auto care more convenient and economical.

## Time is Money

**Time Is Money When It Comes To Car Maintenance (NAPSI)**—Whether changing the oil, replacing the wiper blades or checking the tires, finding the time to perform simple preventative vehicle maintenance is money in the bank.

According to research conducted by automotive market research firm IMR Inc., one out of three consumers who put off routine vehicle maintenance do so because they cannot find a convenient time. In addition, millennials and those who own

In addition, the council's popular “Car Care Guide” for motorists is available at no charge, electronically or by printed copy, in English and Spanish. The guide covers major services, component groups within the vehicle, service interval recommendations and much more.

The council is the source of information for the “Be Car Care Aware” consumer education campaign promoting the benefits of regular vehicle care, maintenance and repair to consumers.

## CHIEF CHRIS MCKINSTRY

### Multi Modal Paths are not only for Golf Carts

The term “Multi-modal” is commonly used to describe shared use paths since it accommodates multiple forms of transit.

Multi-modal or Shared Use Paths are paved, off-street travel ways designed to serve nonmotorized travelers. Across our community, golf carts and bicyclists are typically the most common users of shared-use paths. However, shared-use paths are frequently also used by pedestrians, roller skaters, skateboarders, wheelchair users, and users of many other modes except automotive.

Diamonds painted on the road indicate a restricted lane, which means only vehicles meeting certain criteria may use the lane. This is usually further indicated by a sign with the same diamond on it, displayed overhead of the lane or at the side of the road, or painted on the lane, which describes the restriction.

Local government agencies are frequently asked who is allowed to use the Multi-modal paths.

Within the Town of Lady Lake, Avenida Central, Del Mar Drive, Rio Grand Avenue and Chula Vista Avenue all have side lanes with the diamond painted on them. These

are designated as PED or pedestrian lanes. It is a common misunderstanding that these lanes are dedicated for golf carts use only. These are considered “Shared Use” lanes since pedestrians, bicycles, and golf carts may utilize them.

Florida State Statute provides guidance for pedestrians while using a PED lane adjacent to a roadway.

316.130 – Pedestrians; Traffic Regulations

(4) Where sidewalks are not provided, any pedestrian walking along and upon a highway shall, when practicable, walk only on the shoulder on the left side of the roadway in relation to the pedestrian's direction of travel, facing traffic which may approach from the opposite direction.

Florida Greenbook provides the following definition:

Paved facilities physically separated from motorized vehicular traffic by an open space or barrier. May be within the highway right of way or an independent right of way, with minimal cross flow by motor vehicles. Users are non-motorized and may include: pedestrians, bicyclists, skaters, people with disabilities, and others.

On shared-use facilities, the presence of pedestrians can be detrimental to golf cart or bicycle operation because pedestrians move at much lower speeds which is one of the reasons that The Villages as well as other areas of Town are designated as “Golf Cart

Communities”. This designation allows golf carts to travel on the same roadways as regular vehicular traffic. Signs are posted in these areas to designate the allowable use and end at signs with “No Golf Carts Beyond this Point”. Nothing in these areas restrict the golf carts to use the side lanes, they have the same use of the entire roadway as vehicular traffic.

It is important to remember that blind and mobility-impaired residents will also utilize our Multi-modal paths. Other users should be cognizant of their requirements to yield the right of way in the following circumstances.

#### Blind Persons

The primary traveling aids for a person who is blind are often a white cane or a trained guide dog. Independent travel involves some risk that can be greatly reduced when you are aware of the use and meaning of a white cane or guide dog.

Florida State Statutes specifically addresses motorist responsibilities as follows:

Whenever a pedestrian is crossing, or attempting to cross, a public street or highway, guided by a dog guide or carrying in a raised or extended position a cane or walking stick which is white in color or white tipped with red, the driver of every vehicle approaching the intersection or place where the pedestrian is attempting to cross shall bring his or her vehicle to a full stop before arriving at such intersection or place of crossing and, before proceeding, shall take such precautions as may be necessary to avoid injuring such pedestrian.

Simply put, that means drivers must

always yield the right-of-way to persons who are blind. When a pedestrian is crossing a street or highway guided by a dog or carrying a white cane (or a white cane with a red tip), vehicles must come to a complete stop.

#### Mobility-Impaired Persons

Drivers must yield the right-of-way to mobility-impaired persons and pedestrians utilizing the assistance of a guide dog or service animal. When a pedestrian is crossing a public street or highway and the pedestrian is using a walker, a crutch, or an orthopedic cane or wheelchair, vehicles must come to a complete stop.

The men and women of the Lady Lake Police Department want you to have an enjoyable experience on our Multi-modal paths, they are a part of what makes this such a unique community. Remember that a little courtesy goes a long way in reducing stress or the potential for accident or injury. Please be safe.

# Attorney General Bondi

September 21, 2018

No matter how big or small the target is, identity theft is a devastating crime that can leave individuals and families with heavy financial hardships. Understandably, victims can experience high levels of anxiety and emotional distress for months and even years trying to clear their names.

This week, my Office of Statewide Prosecution successfully prosecuted a Palm Beach County man on two counts of public assistance fraud and two counts of identity theft. The defendant stole names, social security numbers and dates of birth from hundreds of victims.

Michelson Janvier used this information to apply for Food Stamp benefits, otherwise known as SNAP/EBT benefits through the Florida Department of Children and Families. Janvier physically obtained EBT cards in the victims' names, using them to make purchases at numerous South Florida retailers and even trafficked in food stamps at a market in Hialeah. Assistant Statewide Prosecutors Jonathan Bridges and Patricia Abdi prosecuted this case.

In 2017, Florida ranked second among U.S. states in identity theft complaints.

Anybody can have their identity stolen. If you do fall victim, my [Identity Theft Victim Kit](#) is a useful tool to curb the damage and protect your finances. The kit provides specific instructions on combating identity theft, along with how to properly file police reports and work with your financial institutions.

Identity thieves are very conniving and use multiple techniques to steal information. Please take steps now to protect your information by visiting <http://myfloridalegal.com/pages.nsf/Main/>

## Florida Information Protection Act

Under the Florida Information Protection Act, Florida residents are supposed to be notified if they are a victim of a data breach within 30 days. Given how expansive and complex our use of cyber platforms have become, we must take every precaution to protect the personal information of Floridians, and frankly all Americans, from being exposed and used against them.

This week, I along with 49 other attorneys general and the District of Columbia, reached a major settlement with the ride-sharing transportation company, Uber, after they allegedly failed to report a 2016 breach of their drivers' personal information.

While it appears that no sensitive information was dispersed, Uber did not alert its drivers or report the incident until a year later. People with compromised information need to be alerted immediately so they can take steps and guard against identity theft and potential financial losses.

I am proud to say that Florida was one of the first states to launch this investigation that led to this \$148 million settlement. I hope this settlement will send a strong message that quicker reporting of massive data breaches is essential.

We are always looking out for our citizens, but you also have the power to take measures in protecting your valuable and private information from ending up in the wrong hands. Next month happens to be National Cybersecurity Awareness Month. There are multiple ways consumers can be cyber smart, such as not oversharing your personal information online or protecting your password. The Department of Homeland Security has worthwhile lessons on their website about online safety. I encourage everyone to go check them out, <https://www.dhs.gov/be-cyber-smart>

## Heroin Trafficker Sentenced to 25 Years in Prison

TALLAHASSEE, Fla.—The Attorney General Pam Bondi's Office of Statewide Prosecution today announced the conviction and sentencing of Willie Marion Jenkins, a St. Petersburg heroin trafficker. OSP prosecuted the case and a Pinellas County jury found Jenkins guilty of trafficking

illegal drugs and conspiracy to traffic illegal drugs. The Honorable Frank Quesada imposed a 25-year state prison sentence on the defendant. Jenkins' conviction follows guilty pleas from four criminal associates.

In September 2014, authorities arrested Jenkins, along with associate Mary Hampton, following a several months-long investigation into the heroin distribution by Jenkins' network of drug dealers in South St. Petersburg. The Drug Enforcement Administration and St. Petersburg Police Department conducted the investigation, with assistance from the Bureau of Alcohol, Tobacco, Firearms and Explosives. During the investigation, law enforcement seized approximately four ounces of heroin and one firearm.

The three other associates, Edmond Evans, Travis Times and David McGhee, all pleaded guilty to first-degree felonies of conspiracy to traffic in heroin, four grams or more, but less than 14 grams. Hampton previously pleaded guilty to possession of heroin, a third-degree felony.

Attorney General Bondi's Assistant Statewide Prosecutor Jessica Costello and Deputy Chief Assistant Statewide Prosecutor Joseph Spataro prosecuted the case.

Gov. Scott Appoints Two to Commission on Ethics

TALLAHASSEE, Fla. – Today, Governor Rick Scott announced the appointment of William Meggs and Garrett Richter to the Commission on Ethics.

Meggs, 75, of Tallahassee is a former State Attorney for the Second Judicial Circuit Court of Florida. Meggs also served as Leon County Deputy with the Leon County Sheriff's Office and has served as President of the Florida Prosecuting Attorneys Association. He fills a vacant seat and is appointed for a term beginning September 27, 2018, and ending June 30, 2019.

Richter, 68, of Naples is the President and Chief Executive Officer of First Florida Integrity Bank. He is a former State Representative and Senate President Pro Tempore and served as Chairman of the Senate Committee on Ethics and Elections. Richter served both in the United States Army and United States Air Force Reserve and was awarded a Bronze Star and the Vietnamese Cross of Gallantry. He fills a vacant seat and is appointed for a term beginning September 27, 2018, and ending June 30, 2020.

The appointments are subject to Senate confirmation.

Gov. Scott Reappoints Two to Department of

Elderly Affairs Advisory Council

TALLAHASSEE, Fla. – Today, Governor Rick Scott announced the reappointment of two to the Department of Elderly Affairs Advisory Council.

Kerry Marsalek, of Clearwater, is the manager for the Clearwater Office on Aging. She is reappointed for a term beginning September 27, 2018, and ending September 30, 2020.

Dr. Mohammad Choudhry, 52, of Leesburg, is a Neurophysician. He is reappointed for a term beginning September 27, 2018, and ending September 30, 2019.

**Mote Marine Laboratory Ozone Systems**

TALLAHASSEE, Fla. – Today, Governor Rick Scott announced that the State of Florida will direct a \$2,178,000 investment to test innovative technologies to mitigate the effects of red tide utilizing specialized clay field experiments and other innovative approaches for controlling and mitigating the impacts of red tide including expansion of Mote Marine Laboratory's Ozone Treatment System. Mote Marine Laboratory has continuously and successfully tested the Ozone systems in both their tanks at the Mote Marine Laboratory aquarium in Sarasota and most recently in canals in Boca Grande. These systems have proven to successfully clean

water, ridding it of the algae that causes red tide. Three additional mitigation technologies are also in development at Mote Marine Laboratory. Last week, Governor Scott announced a partnership between the Florida Fish and Wildlife Conservation Commission (FWC) and world-renowned experts and scientists from the Woods Hole Oceanographic Institution, Mote Marine Laboratory, the University of South Florida (USF) and the Florida Department of Environmental Protection (DEP) to focus on using a form of specialized clay to quell the effects of red tide. Red tide is naturally-occurring algae that has been documented along Florida's Gulf Coast since the 1840's and occurs nearly every year. For more information on red tide in Florida, go to <http://myfwc.com/research/redtide/faq/>.

Governor Scott said, "As our state continues to battle naturally-occurring red tide along our Gulf Coast, we will stop at nothing to help our communities deal with this issue. Today, I'm proud to announce the latest of our aggressive actions to fight red tide and direct nearly \$2.2 million to Mote Marine Laboratory to expand its Ozone Treatment Systems, and fund work of a new partnership between the state and world-renowned scientists that we announced last week between FWC, Woods Hole, Mote Marine Laboratory, USF and DEP to conduct new field testing of a specialized clay focused on quelling red tide.

"Last week, I urged FWC to create a new Florida Center for Red Tide Research and reconvene the Harmful Algal Bloom Task Force and since red tide began impacting our shores, we have directed more than \$14 million in grants and other funding to combat this natural phenomenon. Florida will not stop working until our communities recover from red tide and the innovative and deliberate steps we have taken over the past week show our resolve to act quickly and do whatever it takes to get results for the families of our state."

Dr. Michael P. Crosby, President & CEO of Mote Marine Laboratory said, "Mote Marine Laboratory welcomes this significant support from Governor Scott to build on the wealth of knowledge that has resulted from many years of impactful research collaborations with FWC and other partners by launching a rapid response initiative that will utilize applied science and innovative technology approaches for controlling and mitigating the impacts of red tide. The primary focus of this initiative will be to determine the most effective and ecologically sound methods for mitigating adverse impacts from the harmful algae, *K. brevis*, along the southwest Florida coast and canal systems. The initiative will be structured to rapidly examine novel potential mitigation products through laboratory, mesocosm and pilot-scale field deployments that may have applications for other harmful algal blooms throughout Florida and around the world."

Last week, Governor Scott wrote a letter to the FWC commissioners urging the Commission to create the Florida Center for Red Tide Research as a new resource for local communities impacted by red tide, re-establish the Florida Harmful Algal Bloom Task Force, and request an increase of funding for red tide research during the upcoming 2019 Florida Legislative Session. See the Governor's letter at <https://www.flgov.com/2018/09/20/gov-scott-fwc-should-create-new-red-tide->

## ONE PERSON'S OPINION

# LETTERS TO THE EDITOR

Reason 1. My quest: Why humans are the way they are? Why can't they be nicer to each other, or just leave others alone. The Power Luster's and Greed Mongers need help. Most of us only need to feel comfortable and we can be content, others need luxurious, sumptuous, lives, even if it is at our expense. Is it a disease? How do we fix this? I do not want a luxurious, or sumptuous life. This very week, I found the most tedious, but enlightening book, that deals with this very issue: Neither Left Nor Right: Preventing America's Decline into Socialism, by Charles Konia, M.D. Also looking for the flaws that need to be , and can be, corrected in Capitalism.

I have given it thought, and could not handle a luxurious kind of life. Have you ever given any thought to what would constitute a pleasant life for yourself? What

can you handle? Realistically? Could you, or would you want to handle a 21 bedroom house? Yuck!!!!

I want a happy life. Good family, good friends, ability to laugh, feel safe, ability to make my own decisions, ability to know what I can afford and live accordingly. God gave me a brain, I want to use it.

Reason 2. John Dewey father of American Education started it, with his Dumbing Down Education Theory. Common Core seems to be the culmination of the Process.

Can humans find happiness? Not if we do not even give it a thought.

Get rid of Phonics. Math. Education as we know it. See: John Dewey's Plan to Dumb Down America , May 1898, Camp Constitution Press. Look it up

Do It Yourself Knowledge Accumulation

is the way to get a quality education. Elites never want you to learn what they are doing to you. Dewey gave this as the reason for the Dumbing Down, he proposed.

American children are being brain washed, and propagandized. Look at the text books. Scandalous.

At first, sitting and reading book after book is hard, but it has become a joy, something you look forward to doing. Wanting to learn can become addictive. A good addiction. Take the time, make the time. TV time can be sacrificed.

Try it, you might like it!!!!

Knowledge is the Crown Jewel in a person's life

D.I. L.

Sent to me by DJL

Must Read on NFL

NFL History...history not often reported or leaked to the ticket holders. I hope this helps you; it opened my eyes, to better understand when and why the

public's respect for the NFL organization started to crumble....

\* In 2012 the NFL had an issue with Tim Tebow kneeling before each game to pray, they also had an issue with Tebow wearing John 3:16 as part of his eye-black to avoid glare, and made him take it off.

\* In 2013 the NFL fined Brandon Marshall for wearing green cleats to raise awareness for people with mental health disorders.

\* In 2014 Robert Griffin III (RG3) entered a post-game press conference wearing a shirt that said "Know Jesus Know Peace" but was forced to turn it inside out by an NFL uniform inspector before speaking at the podium.

\* In 2015 DeAngelo Williams was fined for wearing "Find the Cure" eye black for breast cancer awareness.

\* In 2015 William Gay was fined for wearing purple cleats to raise awareness for domestic violence. (Not that the NFL has a domestic violence problem...).

\* In 2016 the NFL prevented the Dallas Cowboys from wearing a decal on their helmet in honor of 5 Dallas Police officers killed in the line of duty

\* 2016 the NFL threatened to fine players who wanted to wear cleats to commemorate the 15th anniversary of 9/11.

So tell me again how the NFL supports free speech and expression. It seems quite clear based on these facts that the NFL has taken a position against any action by NFL players demonstrating RESPECT for any issue: For God, social causes such as mental health, cancer, domestic violence, for cops killed arbitrarily for being cops, or for the Memory of 9/11...

BUT they will allow demonstrations of DISRESPECT for our National Flag, our National Anthem, for America , and for the American People, if it will help mollify a particular Group and its supporters. That is who and what the NFL now has shown itself to be.

Dear Editor

Heaven help the men in this Country. When a woman can accuse a man of sexual assault when she doesn't know where it happened, when it happened, or has any proof that it happened except that she said it happened and the man is instantly guilty, by the Democrats and the media, even though he has led an exemplary life has dedicated his whole life to the Constitution and the Rule of Law. Then no man is safe. Brett Kavanaugh has had 65 women and many others attest to his character, had 6 FBI investigations and now another one scheduled, however, that doesn't seem to mean a thing.

Chuck Schumer said two days after Judge Kavanaugh was appointed by President Trump that "They would do whatever it took to stop Judge Kavanaugh from being confirmed." The media has said, "There is always a pattern of more than one sexual assault victim" and lo and behold out comes another victim and another. Who again doesn't know what, when or anything, however, after consulting with their attorneys is convinced that it was Judge Kavanaugh. The Democrats are determined to destroy this man and his family no matter what it takes and it just sickens and disgusts me to see the lengths they are willing to take. Sexual assault should always be taken seriously, however, there also needs to be proof that it did happen.

## Flu-Fighting Facts

(NAPS)—The flu is nothing to sneeze at. According to the Centers for Disease Control and Prevention (CDC), influenza has resulted in between 9.2 million and 35.6 million illnesses annually since 2010. The best way to stay out of such statistics, the CDC says, is for everyone who is eligible and at least 6 months old to get a flu shot as soon as the vaccine becomes available.

To help, all CVS Pharmacy and MinuteClinic locations have the vaccine available seven days a week with no appointment needed.

### Study Shows

That may be just as well, since the annual survey, conducted online by Harris Poll on behalf of CVS Pharmacy [1], found that two-thirds of those surveyed get a flu vaccine every year or plan to get one this year, a 5 percent increase from last year.

One reason so many are flocking to get the shot is the knowledge of last year's flu season—which according to the CDC had flu levels that were the highest observed since 2009. Twenty-two percent of those surveyed[2] say that knowledge of last year's severe flu season makes them more likely to get a flu shot this year. On a similar note, among the 27 percent of parents of children under 18 whose child did not get the flu vaccine last year, 26 percent say they are more likely to get their child vaccinated this year after learning about the notably high flu levels during last year's flu season.

The percentage who get vaccinated at a pharmacy stayed at 22 percent, but the percentage of employed adults who get vaccinated at their workplace fell from 22 percent to 15 percent while those who got vaccinated by a health care professional rose from 44 percent to 48 percent.

The survey also found that doctors' opinions (39 percent), where insurance is accepted (38 percent), and convenience (33 percent) rank among the top three factors in determining where to go for the shot. The flu vaccine is a preventive service under the Affordable Care Act, so it's fully covered and available at no cost through most insurance plans, including Medicare Part B.

### Nurse's Advice

"Surprising to many, it can actually take up to two weeks for the flu vaccine to build immunity," explained Angela Patterson, Chief Nurse Practitioner Officer at MinuteClinic. "Because of this, CVS Pharmacy recommends patients get their flu shot as soon as the vaccine becomes available to ensure patients are the most protected before flu season peaks. Furthermore, influenza strains tend to change each year, so it's very important to get vaccinated annually to make sure you are protected."

### What Else You Can Do

Here are four suggestions:

1. Stay home if you're sick. The survey found that two out of three respondents would still go to work if they had flulike symptoms.

In fact, flulike symptoms haven't stopped some people from going out in public in general:

28 percent have gone to the supermarket  
12 percent have picked up a child from school or day care

10 percent have taken public transportation.

2. Wash your hands often with soap and water. If soap and water are not available, use an alcohol-based cleansing gel.

3. Avoid touching your eyes, nose and mouth. Germs spread this way.

4. Clean and disinfect surfaces and objects that may be contaminated with germs.

### Learn More

Consumers can visit [www.CVS.com](http://www.CVS.com) and [www.MinuteClinic.com](http://www.MinuteClinic.com) for further information and to find a nearby pharmacy or clinic. Customers get a \$5 off \$25 coupon when they get the shot at CVS Pharmacy or MinuteClinic.

[1] Survey was conducted in the United States by The Harris Poll on July 12-16, 2018, among 2,020 adults ages 18 and older.

[2] U.S. adults surveyed who did not get a flu shot last year.

## Taste Of Hispanic Heritage

(NAPSI)—National Hispanic Heritage Month is an opportunity to acknowledge the history, culture and contributions of the people of Mexico, the Caribbean, Central and South America, and Spain. One of the best ways to celebrate, many say, is with food.

Making that easy is one restaurant chain that's having a year-round love affair with Latin and Hispanic cuisine. Long known for its authentic Tex-Mex roots, Church's Chicken®/Texas Chicken® has spent years championing the commemorative period—which runs from September 15 to October 15th—on a global stage.

The first Hispanic influence on the company's menu was the jalapeño pepper—the very first side item ever offered at the restaurant chain. The peppers were added to the menu due to a San Antonio tradition of squeezing their juice over various foods to give them a south-of-the-border style "kick" of heat and spice.

The restaurant's sister brand, Texas Chicken, features the Mexicana Burger on menus worldwide. This tasty chicken burger is a fiesta of tastes and textures, with a juicy hand-battered chicken breast fillet that's topped "taco style" with cheese, fresh lettuce, tomato, spicy mayo, crunchy tortilla chips and chopped onions.

## Beef Jerky Recalls

**Junior's Smokehouse Processing Plant Recalls Beef Jerky Products due to Possible Foreign Matter Contamination Class II Recall 083-2018**

Health Risk: Low

Sep 21, 2018

Congressional and Public Affairs

Autumn Canada (202) 720-9113

Press@fsis.usda.gov

**WASHINGTON, Sept. 21, 2018** - Junior's Smokehouse Processing Plant, an El Campo, Texas establishment, is recalling approximately 690 pounds of ready-to-eat teriyaki beef jerky products that may be contaminated with extraneous materials, specifically pieces of hard metal, the U.S. Department of Agriculture's Food Safety and Inspection Service (FSIS) announced today.

The ready-to-eat teriyaki beef jerky items were produced on Aug. 9, 2018. The following products are subject to recall:

- 4 oz. plastic pouches of "BUC-EE'S HILL COUNTRY BRAND TERIYAKI BEEF JERKY, MADE IN TEXAS FROM SOLID STRIPS OF BEEF, READY TO EAT," labeled with BEST BY 08-09-2019, and a lot code of 220-272.

The products subject to recall bear establishment number "EST. 48213" inside the USDA mark of inspection. These items were shipped to a retail locations in Texas.

The problem was discovered on September 17, 2018, when the establishment received a consumer complaint from a retail store customer regarding metal in the teriyaki beef jerky

product.

There have been no confirmed reports of adverse reactions due to consumption of these products. Anyone concerned about an injury or illness should contact a healthcare provider.

Consumers who have purchased these products are urged not to consume them. These products should be thrown away or returned to the place of purchase.

FSIS routinely conducts recall effectiveness checks to verify recalling firms notify their customers of the recall and that steps are taken to make certain that the product is no longer available to consumers.

Consumers and members of the media with questions about the recall can contact Scott Chambers, chief executive officer of Junior's Smokehouse Processing Plant, at (979) 533-3544.

# Governor Scott

Continued from page 10

research-center-reconvene-harmful-algal-bloom-task-force/

In August, Governor Scott issued **Executive Order 18-221** declaring a state of emergency due to impacts of red tide. To date, Governor Scott has directed grant funding totaling \$13 million for communities impacted by red tide and blue-green algae.

## The State of Florida Has Taken Action on Red Tide:

### Florida Fish And Wildlife

FWC and DEP have provided an additional nearly **\$2.2 million** to Mote Marine Laboratory for the initiation of its field testing of a specialized clay focused on quelling red tide and expansion of its Ozone Treatment System which takes water containing the algae that causes red tide and filters it, returning clean water back to areas impacted by this naturally-occurring algae.

Governor Scott sent a **letter** to FWC urging the Commission to take the following action on red tide:

Create the Florida Center for Red Tide Research, a new resource for local communities impacted by red tide;

Re-establish the Florida Harmful Algal Bloom Task Force; and

Request an increase of funding for red tide research during the upcoming 2019 Florida Legislative Session.

At Governor Scott's direction, FWC has partnered with world-renowned experts and scientists from the Woods Hole Oceanographic Institution, Mote Marine Laboratory, the University of South Florida and DEP to focus on using a form of specialized clay to quell the effects of red tide. See the announcement <https://www.flgov.com/2018/09/19/gov-scott-fwc-launches-innovative-partnership-with-world-renowned-scientists-to-combat-red-tide/>

FWC is providing **\$1.2 million** to enhance research and production of redfish at the FWC Stock Enhancement Research Facility at Port Manatee. Learn more at <https://www.flgov.com/2018/09/17/gov-scott-additional-1-2-million-for-redfish-hatchery-will-help-mitigate-impacts-from-red-tide/>.

DEP and the FWC have provided **\$100,000** in additional funding to Mote Marine Laboratory to support efforts to

rescue distressed marine animals, such as dolphins, sea turtles and manatees.

Continuation of enhanced water monitoring and testing by DEP and FWC to give scientists the best possible data to work with.

At Governor Scott's direction, FWC has mobilized all available resources to mitigate naturally occurring red tide, and Executive Director Eric Sutton has waived rules through an executive order to expedite the removal of dead fish – regardless of applicable bag, size, or possession limits or of season or area closures – from shoreline, inshore or nearshore areas in the following counties: Collier, Lee, Charlotte, Sarasota, Manatee, Hillsborough and Pinellas.

FWC law enforcement officers have been actively helping with animal rescue and red tide reconnaissance work.

Additional biologists and scientist are available to support local government's response to red tide and protect wildlife.

FWC is performing increased aerial surveys of the red tide bloom.

FWC is operating the toll-free fish kill hotline. To report fish kills, contact the FWC Fish Kill Hotline at 800-636-0511 or **submit a report online**. Reports from this hotline help FWC researchers track and better understand the impact of red tide in Florida.

FWC remains available to local agencies and partners in affected areas, including area business and tourism groups in Southwest Florida. Any local agency or group that has any questions or concerns can contact Susan Neel from the FWC at 850-528-1755.

FWC continues to partner with the Florida Department of Health (DOH) to advise residents and visitors of any potential health impacts. Residents and visitors can contact DOH's aquatic toxin experts at 850-245-4250 or contact their local health department for any concern about health safety.

FWC's Fish and Wildlife Research Institute and Mote Marine Laboratory work together to monitor *Karenia brevis*. This cooperative effort is designed to help mitigate the adverse impacts of red tide. This joint research program that includes red tide monitoring, research and public outreach and education has resulted in better tools and ongoing monitoring for red tides along the Gulf Coast.

In partnership with FWC, the Collaboration for Prediction of Red Tides (CPR) at the University of South Florida offers a new Harmful Algal Bloom tracking tool that generates a 3.5-day forecast of the bloom trajectories.

To protect public health, FWC's Fish and Wildlife Research Institute's Harmful Algal

Bloom group closely monitors the status of *Karenia brevis* on Florida's coasts, providing technical support to the Florida Department of Agriculture and Consumer Services (FDACS), the agency that regulates approved shellfish harvesting areas.

Since 2000, FWC's Fish and Wildlife Research Institute established a Red Tide Offshore Monitoring Program, which is a volunteer program for citizens to help collect water samples from routine collection points and sites reported for suspected harmful algal blooms. The timely sampling by volunteers allows researchers to provide an early warning of offshore algal blooms and investigate reported events as they occur. The Program needs volunteers to collect samples from all coastal Florida counties. To view more information visit, **Red Tide Offshore Monitoring Program** or use the **Volunteer Sign Up Form**.

### Environmental Protection

- DEP has provided **\$13 million** in funding to support efforts to battle impacts of red tide and blue-green algae in the following counties:
- More than **\$1.3 million** for Pinellas County;
- **\$750,000** for Manatee County;
- Nearly **\$350,000** for Charlotte County;
- More than **\$190,000** for Collier County;
- Nearly **\$1.5 million** for Sarasota County;
- A total of **\$3.9 million** for Lee County; and
- **\$700,000** for Martin County.

DEP continues to perform enhanced water testing, beach cleanup and public outreach, as well as the deployment of additional biologists to assist communities dealing with naturally occurring red tide.

### Health and Safety

Florida's County Health Departments have taken the following actions:

DOH-Lee has posted and is maintaining red tide signs at more than 180 beach access points along the Lee County coastline. The red tide signs provide details on respiratory issues, health precautions, and resources for FWC, Mote Marine Laboratory and current beach conditions. Environmental staff and County Health Department (CHD) leadership are in contact with city and county leadership, as well as local partners, in order to coordinate efforts and messaging. A press release detailing the effects of red tide and resources for mediation was sent out to local media partners. Additional resources, like website materials, social media posts, etc., have been shared with local partners for their use and distribution to their partners. More substantial red tide signs were purchased in August and staff replaced the damaged/missing signs along the beach access points, as well as added additional signs at popular fishing sites and boat ramps. More than 300 total signs have been posted in Lee County.

DOH-Manatee has hosted a discussion with community partners to understand current roles and share resources. The CHD has a distribution list setup to share information quickly with key personnel. They are also helping to coordinate discussions to help our partners meet on a periodic basis.

DOH-Sarasota leadership and environmental staff have been in contact

with city and county government and Visit Sarasota in order to coordinate messaging and provide template signage, website links, and creative materials. The CHD has also worked with the county in order to post signs at every beach, provided rack cards to the county and Mote for distribution.

DOH-Charlotte has posted signage along the beaches to advise visitors and tourists about the water conditions. The CHD has performed outreach to their community partners, as well as local government, to share informational resources, creative materials and public health messaging. They also are coordinating efforts and assisting their sister agencies, as needed.

DOH-Pinellas is currently working with the county government to update a red tide webpage that provides public health and safety information. Environmental staff are in constant communication with central office subject matter experts to discuss outreach and other best practices, should they be needed.

DOH-Hillsborough is working with their community and county officials to finalize a joint information system, and continues to monitor the situation.

### Business and Industry

At the direction of Governor Scott, VISIT FLORIDA began developing a marketing campaign to assist Southwest Florida communities that will start following this year's red tide blooms.

VISIT FLORIDA created a **\$500,000** Tourism Recovery Grant Program for Red Tide to assist local tourism development boards in counties affected by the naturally-occurring red tide.

VISIT FLORIDA launched a Red Tide Recovery Marketing Program offering six months complimentary VISIT FLORIDA marketing partnership, which includes an **enhanced web listing on VISITFLORIDA.com**, public relations and social media resources and the opportunity to have a presence in the official Florida Welcome Centers with brochure distribution, lobby booth displays and showcase participation.

The Department of Economic Opportunity (DEO) has activated the Small Business Emergency Bridge Loan Program to provide short-term, interest free loans to affected businesses.

DEO continues to encourage impacted businesses to submit a business damage **assessment survey** at **<http://www.FloridaDisaster.biz>**. Surveys help DEO and their partners determine additional resources that may be made available to help the business community recover.

Following requests by Governor Rick Scott, the U.S. Small Business Administration (SBA) issued a disaster declaration on red tide.
